DETAILED ACTION

Status of Claims

1. The amendment filed 12-26-2006 has been entered. Claims 1, 2, 9, 10, 16, and 29-51 are pending.

Election/Restrictions

2. The applicant elected without traverse Group III, Figs. 4A-5C, in the reply filed on 10-11-2005.
3. New claims 29-51 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 9, 10, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Benedict et al. (US#5675876).
6. Regarding claims 1 and 2, Benedict discloses a casket 10 comprising: a shell 12; a lid 14; and a deployable structure, namely shelf 30, pivotally mounted at an upper edge of shell wall 52 and secured thereto (i.e. formed integrally therewith), the structure (shelf) defining a memorial surface when deployed. It is noted the items of memorialization are not being positively claimed, and the structure (shelf) is capable of functioning in conjunction with items of memorialization as claimed.

7. Regarding claim 9, shell wall 52 is being viewed as the forward side of the shell.
8. Regarding claims 10 and 16, the shelf is mounted at the lower end of shell wall 52 per Fig. 1, and this lower end of shell wall 52 is being viewed as the foot end.

Response to Arguments

9. Regarding claim 1, the applicant argues the Benedict structure (shelf) is used for both display and storage of the memorialization items as opposed to being used for display only and not for storage as now claimed by the applicant. While the examiner acknowledges the Benedict structure is specifically disclosed as potentially being used to store memorialization items, the Benedict structure remains capable of not storing items of memorialization. This capability meets the argued negative limitation as the items of memorialization are not being positively claimed and represent the intended use of the invention. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In this case, the Benedict structure (shelf) is capable of being used in conjunction with the items of memorialization as claimed by the applicant, i.e. for display only and not for storage.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
